

# Snap and Read Universal

Check out <http://donjohnston.com/snap-read/>

**Snap & Read** is your Universal tool for accessible reading on Google Chrome!

- Reads text aloud (both accessible and inaccessible) on Google Drive, email, websites, and even PDFs
- Dynamically levels text
- Translates text into over 90 languages
- Works with Bookshare books
- Works with Kindle Cloud Reader
- Proves outcomes with data!

Not all text readers are created equal, and Snap&Read helps students in ways *no other tool can*. Only Snap&Read:

- **Dynamically Levels** complex passages by adjusting needlessly difficult vocabulary (without changing the meaning/rigor)
- **Reads inaccessible text** (Flash, images, and PDFs) on Google Chrome *without a complex conversion process*
- **Reads PDF and Bookshare books** in the Chrome browser
- **Supports Kindle Cloud Reader** (works with over 3.2 million books)
- **Works offline** — if your school is like most and has internet outages or speed issues, you need this!
- **Translates text into over 90 languages** — including entire pages and after Dynamic Text Leveling!
- **Gives Smart Data** — See how much your students are reading and the level of text they're reading.

## Dynamically Levels Text

Students often shut down when they face text above their reading levels. These students need their text made more readable. Snap&Read does just that! It allows students to **dynamically adjust text across the web** *without changing the meaning*. The result? Students get control over the most challenging texts like Shakespeare, and the Declaration of Independence!

## Translates into 90+ Languages

**NEW!**

Learning a new language is difficult enough. It's even more difficult to soak up grade-level content in that new language—especially with challenging vocabulary.

Snap&Read takes a creative approach to language support through a combination of Dynamic Text Leveling, text-to-speech, and translation.

## Proves Outcomes with Data

**NEW!**

Quickly see how much students are reading and the readability levels of the what they read. This data gives you the data you need to make smart decisions and implement with a level of fidelity that you've never had before. Snap&Read complies and collects all of this data in a way that protects student privacy.

# Co:Writer Universal

Check out <http://donjohnston.com/cowriter/>

**Writing** comes from the human desire to communicate—to take an **idea** and express it in **words**. But for some students, the words don't come out right. There's a wall between the idea and writing it out. Grammar and spelling get in the way. Word recall is a barrier. This is where Co:Writer comes in. It uses grammar- and vocabulary-smart word prediction to help students better express their ideas in writing.

## Integrates across Google, iPad, and Desktop

Whether on iPad, iPhone, Chromebook, or desktop, your students will have access to their favorite writing tool! Preferences and Dictionaries are stored in the cloud, so your students can access their personalized supports from anywhere, on any device—and even take it offline.

## Supports Vocabulary in the New Standards

Over 4 million Topic Dictionaries supply vocabulary from **every** college and career-ready standard from *Atomic Structure to Penguins*. This helps students write with more academic and topic-specific vocabulary.

## Proves Outcomes with Data

Co:Writer data gives you a level of fidelity of implementation that you've never had before. Quickly see how much students are writing and their vocabulary usage while protecting student privacy.
